

# THE MIRROR JOURNAL

Serving A Most Progressive People In The Most Prosperous District In Central Alberta

VOL. 10, NO. 19

MIRROR, ALTA., APRIL 23, 1924

\$2.00 PER YEAR

## YOUR WINDOWS ARE THE EYES OF YOUR HOME KEEP THEM BEAUTIFUL

SCRIMS in white or cream, priced per yard, from..... 30c to 55c  
COLORED MARQUISSETTE, 36 inches wide, in nice designs, priced per yard..... 50c  
DRAPIERIES in a number of different patterns and colors, yd..... 50c & 60c

### White Damask Table Cloths

With blue borders, in three sizes. These are something new and attractive.

Priced \$2.00 to \$3.75

Our Grocery Stock is both Complete and Fresh

**McNAIR BROS. Mirror**

## Formaldehyde

A fresh stock just received at prices to suit.

**Ferry's SEEDS Steel Briggs'**

Also Onion Sets, Multiplifiers, Grass and Clover Seeds, Corn, Peas, Beans in Bulk.

### PAINT TIME

See us for Paint Brushes, Kalsomine, Varnish Stain, House Paint

12 ft. LINOLEUM, TO CLEAR..... AT \$4.50 YARD  
BEDS, SPRINGS, MATTRESSES..... AT REDUCED PRICES

How about that new Range?

Let us show you what we have. ?

**KITCHEN CABINET** We have arranged to sell to the line on the extended payment plan, namely, \$10.00 cash, the balance in monthly payments of \$10.00 each..... PRICE \$65.00

### Very Special

2 CHAMPION 500 lbs. CEASER SEPARATOR..... \$55.00  
(Let us show you this)

**SPIECE & SON**

PHONE 15 MIRROR BOX 15

### School Re-opens Monday

The Mirror school is closed this week for the Easter vacation and all the teachers, Misses Emily, Dorothy, Margaret and J. F. Baugh, are attending the Teachers' Convention, which is being held in Calgary. School will reopen on Monday, April 28th, with four rooms instead of three. Mrs. J. F. Baugh is the new teacher.

J. W. Hume shipped a carload of fat cattle to the Calgary market last week. Wilbur Mitchell was in charge of the shipment.

### Fixing Up Roads

Considerable roadwork will be done in divisions 5 and 6, of Lamerton Municipal District, No. 389. J. C. Cairns and R. B. Baugh are attending the Teachers' Convention, which is being held in Calgary. School will reopen on Monday, April 28th, with four rooms instead of three. Mrs. J. F. Baugh is the new teacher.

Mrs. C. Dunn, was an Easter visitor with Mrs. H. S. Crucifix.

## A New Assortment of White Chinaware Newly Arrived

Cups and Saucers, Bakers, Scallops  
Vegetable Dishes, Bowls, Jugs  
Als Mixing Bowls and Bean Pots

**TEAPOTS 50c, 60c and 70c**

We have

Enamel

**Wall Paper and  
Alabastine**

for your spring diet

**Potatoe Pots**  
large size, at special  
\$1.25 each

## New Spring Suitings

from Scotland Woolen Mills, at \$25.00 per ft. Suit.  
Let's size you up.

**Panrucker's Store - Mirror**

## RESULTS OF THE EASTER EXAMS.

Report of standing of pupils of Mirror Consolidated School for term ending April 17, 1924.

### SIXTH ROOM

Grade XI.— Margaret MacLean, Eila Pemberton.

Grade X.— Florence Annesley..... 90  
Helen MacLean..... 89  
Edna Brewster..... 88

Grade IX.— Ruth McLaren..... 83  
Netta Oldring..... 78  
Helen MacLean..... 78  
Clarice Marshall..... 75

Margaret Lakey..... 73  
Mac Annesley..... 68

Norman Ray..... 68  
Audrey Dowswell..... 61

Dorothy Pyper..... 62

Virgil Neas..... 55  
Grace Tullock..... Absent

Grade VIII and VINTN' combin-ed.—

George Oldring..... 91  
Helen MacLean..... 91

Jack Annesley..... 88

Majorie Holditch..... 85

Joseph Tullock..... 85

Emma Durrant..... 84

Ernest Connon..... 84

John Marshall..... 84

Jas. Holditch..... 65

Beatrice Martin..... 55

Jas Oldring..... 55

Lloyd Holditch..... 45

Eva Beamanish..... 45

Harold Annesley..... 38

Martin King..... Absent

J. F. BAUGH, Principal.

### INTERMEDIATE ROOM

Grade VI.—

George Mackay..... 88

Augusta Pederson..... 85

Horace Oldring..... 81

Andrew Tiller..... 83

David Whiting..... 79

Myrtle Symons..... 65

Grade V.—

Frank Holditch..... 80

Mac Steele..... 85

Robert Cairns..... 84

John H. Hanson..... 83

Vera Brewster..... 83

James Annesley..... 76

Addie Croxton..... 76

Barbara Walker..... 75

W. H. Williams..... 75

Robert Oldring..... 70

Alma Pederson..... 68

Flossie Zacharuk..... 65

Ruth Oldring..... 63

Alma Beamanish..... 63

Carl Martin..... 59

Bert Crook..... 57

Grade IV.—

Edith Hutchinson..... 91

Douglas Williams..... 86

John Oldring..... 84

Nettie Zuckaruk..... 83

Roy Walton..... 79

Isabel Cairns..... 74

Thelma Purdon..... 71

Elsie Martin..... 71

Following pupilout of school

owing to sickness and unable

to try exams: Grade VI.—

Harry Flewelling, Grade IV.

Hugh Bullock, Ross Flewelling, Ross Flewelling.

Claude Bennett, E. KATHLEEN ENNIS, Teacher.

### PRIMARY ROOM

Grade III.—

Arthur Jewell..... 92

Alison Webster..... 78

Edward Oldring..... 77

Nelson Bryan..... 76

Isabel Martin..... 68

Dougal Walton..... 67

Valerie Brewster..... 42

Grade II.—

Howard Croxton..... 96

Jean Cairns..... 95

Matteo Zacharuk..... 94

George Annesley..... 88

John Oldring..... 80

Russell Fairchild..... 75

Agnes Whiting..... 71

Walter Holditch..... 70

Stephen Bucher..... 69

Laura Pederson..... 68

Genevieve Purdon..... 48

Grade I Senior.— Jim Lee, Katherine Williams, J. A. C. Spice, Dorothy Bennett, Shirley Kainos, Teddy Godard, Fern Martin, Bobbie Brown, Holmer Pederson, Dannie Becker, Eva Symons.

Grade I Junior.— Bruce Croxton, Thomas Walton, Stanley Crook, Doris Jewell, Alfred Crook.

Absent: Grade III.— Aretha Cook, Eleanor Watters, Wilfred Symons. Grade II.— Frances Hume, Helen Hume, Hilda Cook, Mary Sales, Eric Eissens, Jack Stratton, Rohit Symons, GERTRUDE PANRUCKER, Teacher.

## WILL HAVE LOCAL STRAWBERRY CROP

Robt. Carr, who farms on the south shore of Buffalo lake will branch out into the raising of strawberries this coming summer. Last year he put in 1000 plants of the "Senator Dunlop" variety, and this year he expects to set out 4000 more of the same. The plants are still covered with straw and Mr. Carr is only waiting warmer weather to remove their winter blanket.

With favorable growing conditions, the vines should average about 1500 feet of vine to the plant during the season.

It goes without saying, that there will be a big demand by the local market for the home-grown strawberries and Mr. Carr should have no difficulty in disposing of all that fruit he can raise.

Even if the season should turn out to be a poor one the strawberry patch will not suffer from the drought, as an irrigation plant can be installed, and in Buffalo lake, there is an abundance of water close at hand.

The location will be given more detail when the first crop is harvested.

Mr. Carr also expects to try out the growing of plums and will plant a number of trees this year.

### 1st Fortnightly Crop Report

Issued by the Department of Agriculture, Government of Alberta, Saturday, April 19.

Opening of the 1924 crop season saw the soil conditions somewhat more favorable than last year, speaking, that was the case 12 months ago.

The winter was extremely mild, but the spring was extremely cold, causing considerable damage to the soil which has been absorbed by the land and has rendered the surface condition very satisfactory.

Over the majority of the province there is sufficient moisture in the soil to germinate the new crop. In the southern and eastern parts of the province however, soil conditions are very dry, there having been very little snow during the winter, with low temperatures during the spring.

The lateness of the spring has retarded work upon the land in most parts of the province, and it will be another week at least before spring operations begin in earnest.

Work is being done on land, and there are one or two reports of seeding having been commenced.

General seeding operations, however, will be about two weeks later than last year.

In spite of the open fall, very little fall plowing was done last year, owing to the prolonged snowfall.

The same surface condition as last year will be found in the south of the province.

Livestock was never in better condition. The large amount of feed produced last year, and the mildness of the winter has brought them through the winter in excellent shape.

There has been a brisk demand for farm labor, and the price of labor has been very high during the past few weeks placing a large number of hands, many of whom are immigrants from European countries. The demand is continuing to a certain extent.

# RED ROSE

## TEA is good tea

and the choicest of Red Rose Teas is the  
ORANGE PEKOE QUALITY

On To The Bay!

In the oil-welds-around universal demand in Canada for reduced expenditures and reduction in taxation, and which it is pleasing to note is making itself felt at Ottawa, in the several Provincial capitals, and in practically all municipal centres, there is some degree of danger that people will unfortunately condemn all expenditures on new projects without taking the time to ascertain whether expenditures in certain directions may not be truly economic. This is the kind of danger that interested parties will be behaviour to capitalize the popular demand in order to defer projects which, because of self-interest, they oppose.

If the cost of a \$3,000 building calls for repairs, and heavy loss will result unless repairs are made, it will be the height of folly to refuse the necessary expenditure. The same reasoning applies to the cost of the equipment at a factory was prevented because of lack of a railway siding, it would be foolish to save the cost of such siding at the expense of the proper management and development of the industry. Yet signs are not lacking that, in the demand for reduction in expenditures, just such timorousness will be displayed as that of past years.

The construction of the Hudson Bay Railway is a case in point. Canada has spent some tens of millions on this railway. A hundred or more miles of track have been laid, and more miles of roadbed graded. Large sums have been expended on terminal facilities. Every cent of this money is absolutely necessary to draw away, unless further expenditures are to be completed the undertaking. Yet the public is not satisfied with the results of the railway on extravagances at Ottawa and the "park barrel" stands out the Hudson Bay Railway at attack and denounces the spending of another dollar on it. He charges that it is a purely political undertaking, a huge scheme at public expense to be built in the West.

It is true that the Hudson Bay Railway is approved not by one party seeking votes, but by all three political parties in Canada. It is demanded by all the Provincial Legislatures in the Western Prairie Provinces, by all representative public bodies in the West, and by the people generally. If there is one thing required in the West today it is a restoration of confidence in the railway, and a restoration of the confidence of the road to the West.

Eastern cities, particularly in Montreal and Toronto, scoff at the possibility of the Hudson Bay route. Their opposition is, clearly, based rather on one of its feasibility and success and consequent loss of Western railroads. Hudson passing through or paying toll to these cities. Admittedly, the Hudson Bay route is a better one for a portion of the year. But this is not the only route that would do more than say, one other thing to restore confidence in the railway.

Eastern cities, particularly in Montreal and Toronto, scoff at the possibility of the Hudson Bay route. Their opposition is, clearly, based rather on one of its feasibility and success and consequent loss of Western railroads. Hudson passing through or paying toll to these cities. Admittedly, the Hudson Bay route is a better one for a portion of the year. But this is not the only route that would do more than say, one other thing to restore confidence in the railway.

Eastern cities, particularly in Montreal and Toronto, scoff at the possibility of the Hudson Bay route. Their opposition is, clearly, based rather on one of its feasibility and success and consequent loss of Western railroads. Hudson passing through or paying toll to these cities. Admittedly, the Hudson Bay route is a better one for a portion of the year. But this is not the only route that would do more than say, one other thing to restore confidence in the railway.

People scoffed at Christopher Columbus. Canada itself was deserted as so many acres of ice and snows not worth the keeping. Within the memory of the writer a Toronto syndicate declined a franchise for an electric street railway in Ottawa because it could not be successfully operated in electric power, which might be fitted with similar engines or steam engines and electric motors.

Canada is committed to the Hudson Bay Railway. It will be committed many days. Then who not and begin to reap the benefits of its construction and operation. Critics and opponents say this is the time the Hudson Bay Railway is to be completed. The time is now. The Hudson Bay position will demand economy and careful scrutiny of expenditures not merely in 1924 but for the next twenty-five or fifty years until our war debt is paid off. It is sincerely to be hoped that the present public demand for retrenchment and reduction in taxation is not "a flash in the pan," spacioiusly made and quickly forgotten. If that is all it is, then it will be worse than useless for the tendency will be to follow it with a new age of extravagance.

Every year that passes without the completion of the Hudson Bay Railway means the developmental and prosperity of this section of the Dominion, which is rapidly advancing on all Canadas. Every year means greater development in the work already done on the road, consequent additional ex-

penditure ultimately.

On all counts, therefore, now is the time to press with the completion of the railway as rapidly as possible. "Its ultimate completion cannot be denied. It can only be delayed. Inasmuch as delay means all round, loss, the time is now of reason, why delay?" Rather, let us go "on to the Bay" with all possible speed.

## Butter Shipments to United States

## England Wants African Cotton

Saskatchewan Product is Shipped by the Canadian Railways South of the Line.

For the first time in the past two or three years the Saskatchewan Co-operative Creameries, Limited, a shipping butter in carloads lots direct to the United States. Until recently, no shipment was recently made from Saskatchewan to Philadelphia. Two carloads were also shipped to Chicago, where they realized good prices. Each car contained between 25,000 and 20,000 lbs. of Saskatchewan butter.

It is easy to get anything you want—if it happens to be something that nobody else will have.

Some love affairs end at the altar—but the majority never get that far.

## "Worth \$100 to Me Relieved Eczema and Piles"

Mrs. Peter A. Palmer, Sault Ste. Marie, writes:

"Dr. Chase's Ointment has completely relieved me of eczema and piles. I also used the Ointment for my baby, who had both.

"A few applications were all that was necessary in her case. Dr. Chase's Ointment has been worth a hundred dollars to me—before using it I had spent a great deal more in that in the treatment and treatment by doctors. We have also used Dr. Chase's other medicines, the Nerve Food having restored my health after suffering from severe nerve trouble with a girl."

Dr. Chase's Ointment

60 cts. a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto

## Secure Scientific Data

Smithsonian Institution Describes Exploration and Field Work

The Smithsonian Institute at Washington has just issued a pamphlet describing the explorations and field work conducted by members of its staff or in co-operation with other organizations during 1923. Besides many localities in the United States, the report visits include the Canadian Rockies; the Lang-Tze Valley, China; several islands of the West Indies; Panama; Central America; Labrador and various countries in Europe. The countries which are represented include geology, paleontology, astronomy, zoology, botany, anthropology and ethnology.

Secretary Charles D. Walcott comments on the scientific researches in the Canadian Rockies, mentioning, working especially on the pre-Diemer strata from the Clearwater River southeast in the Bow Valley and along the east side of the Columbia River Valley. The report speaks of the "beetles" being stored in the stem of the plant, which was similar to the beetles which were stored in the stems of plants which had been cut and sprouted with slips from the cane. It is harvested yearly and Dr. Lehmann said the sugar from the beet, the maple tree and the cane were the same, but only the cane beet had sugar in the surface. He mentioned that the impurities in the maple sugar were pleasing to the taste, but those in the beet and the cane were nasty. Thus great pains had to be taken in the refining of the sugar, especially in the case of the beet.

As a result of an effective preparation, the beet sugar is now marketable, and it can be given to the most delicate child without fear of injury to the constitution.

## China For Empire Exhibition

Two Million Boxes Will be Required for Restaurants

Although the public is being educated daily in the gigantic proportions of the Empire Exhibition, it is somewhat astonishing to learn that the number of boxes of China will be required to minister to the needs of the twenty-five restaurants and cafeterias. Of this 99 per cent, is to be made in the potteries by English firms, and 2 per cent represents the total of the 1,000,000 boxes of art pottery devotional wares which will be ordered from the continent for the most exclusive of the restaurants, to which the name "Lucullus" has been given. An order for £10,000 worth of boxes for the 1924 Empire Exhibition with a Birmingham firm, and about 150,000 spoons, forks and knives will be required. Orders for tableware will embrace 720,000 pieces, and 730,000 glasses. 45,000 chairs and 200,000 tables will be required. The largest kitchen at the exhibition will be adequately equipped and will be fitted with the Caterhouse, Co., Montreal

## SATISFIED MOTHERS

No other medicine gives as great satisfaction to mothers as does Dr. Minard's Liniment for Corns. These Tablets are equally good for the newborn babe or older children. They cannot possibly do harm always good. The Tablets are made of the finest herbs and are designed to regulate the bowels and sweeten the stomach and thus relieve babies of any constipation, indigestion, colic, colic, etc. Concerning them Mrs. Arthur Wilson, of "Hab's On Tablets" fame, says: "Hab's On Tablets have been of wonderful benefit to my baby who was always gassy. The Tablets are the best for babies' colic. I am a staunch friend of Dr. Minard's Liniment."

Two important Food Factors Clark's Beans with Pork possess two important food factors. While being delicious, they are also nutritious. The beans are particularly suitable to the Lancashire trade. "If we can grow cotton within the Empire," he said, "let the Clark Cotton help you."

Japs Disturbed Over "Yellow Snow"

Dust From Gold Desert is Explanation of Scientists

A fall of "yellow snow" is reported from Nitagata, on the northwestern coast of Japan. The inhabitants of the region are much disturbed over the falling of this snow, which is considered the phenomenon an emanation of evil intent, but scientists have an explanation.

They believe that clouds of the yellow dust from the Gobi Desert, which frequently are driven over the China and are especially well known in Peking, have been carried across the Sea of Japan in snow clouds. Old inhabitants of the Nitagata district believe that half a century ago there was a fall of "red snow" in that region.

It takes a bacterium to give you the "yellow snow" on the face.

A married man has a word to say on the subject.

Minard's Liniment for Corns

## Sugar Once Used As Drug

Sold in Great Britain For Forty-Three Cents a Pound

"As you pour a little sugar in your tea, you are little aware that you do not know that one time it was used as a drug. It cost forty-three cents a pound?"

This was one of the many topics of a lecture given to the Technical Science Club at the Edmonton Technical School, by A. F. Lehmann, professor of chemistry at the University of Alberta, when he spoke on sugar. Professor Lehmann is one of the most prominent in being in India, and, how it was later taken to Great Britain where it was at first used as a drug. Why it was used this way and the quantity consumed at each meal is not known. A large amount in those days consisted of fifty tons sold at forty-three cents a pound.

The speaker described the sugar as being stored in the stem of the plant, which was similar to the beet, which plants were to be stored in the earth.

He mentioned that the impurities in the maple sugar were pleasing to the taste, but those in the beet and the cane were nasty. Thus great pains had to be taken in the refining of the sugar, especially in the case of the beet.

As a result of an effective preparation, the beet sugar is now marketable, and it can be given to the most delicate child without fear of injury to the constitution.

Two Million Boxes Will be Required for Restaurants

Although the public is being educated daily in the gigantic proportions of the Empire Exhibition, it is somewhat astonishing to learn that the number of boxes of China will be required to minister to the needs of the twenty-five restaurants and cafeterias. Of this 99 per cent, is to be made in the potteries by English firms, and 2 per cent represents the total of the 1,000,000 boxes of art pottery devotional wares which will be ordered from the continent for the most exclusive of the restaurants, to which the name "Lucullus" has been given. An order for £10,000 worth of boxes for the 1924 Empire Exhibition with a Birmingham firm, and about 150,000 spoons, forks and knives will be required. Orders for tableware will embrace 720,000 pieces, and 730,000 glasses. 45,000 chairs and 200,000 tables will be required. The largest kitchen at the exhibition will be adequately equipped and will be fitted with the Caterhouse, Co., Montreal

Colds Stopped In Ten Minutes

There is a new remedy that seems to be the best. It fills the nose, throat and lungs with a healing balsom, fragrance, pine woods, and utilizes the natural properties of the Blue Gum, Tree of Australia.

"The remedy is

"CATARHIZONE" is

equal for colds, coughs or catarrh.

It is a preparation of medicinal pine essence—a clyndate of nature, that's what.

"CATARHIZONE" is, and certain to stop your colds.

Don't stop your stomach with this. It is a special remedy.

"CATARHIZONE" will not quickly.

## Three Prairie Provinces Now Occupy A Supreme Place In Canadian Dairy Industry

Once more in 1922, the three prairie provinces of Saskatchewan, Manitoba, and Alberta, which five or six years ago was impeding butter even into its rural districts, recorded a substantial increase in butter production and further consolidation of the market in the dairy industry. Comparing the figures with 1922, the increase in the output in comers butter in Manitoba amounts to 15.1 per cent., in Saskatchewan to 15.3 per cent., and in Alberta to 15.1 per cent.

The butter production of Manitoba in 1922 amounted to 16,730,150 pounds as compared with 16,559,601 pounds in 1921 and \$241,065 in 1921. That of Saskatchewan increased to 16,800,000 pounds, compared with \$300,111 pounds in 1922 and 7,600,098 in 1921. Alberta's production rose from 12,225,261 in 1921 to 15,157,079 pounds in 1922 and 17,550,000 in 1921. Production in the three provinces taken together in the past three years is as follows: 1921, 28,560,121; 1922, 51,967,815; 1923, 29,347,169 pounds.

The remarkable ascendancy of the prairie provinces in the market for the Canadian dairy industry has been one of the most marked phases of the Dominion's agriculture in the past decade. It is the result of the most skilful planning and industry, the adoption of modern methods and the pursuit of most zealous care. It is the result of more profitable diversified farming. In its wake have come splendid dairy cattle, which the west has already developed and which are now superior in Canada.

The remarkable progress which has been made in dairy production is only equalled by the remarkable progress in other areas.

Going back to the beginning of the last decade, the production in the three prairie provinces in 1910 was 4,619,947 pounds, or insufficient for domestic consumption. In 1922, the same territory produced 16,730,150 pounds, or practically ten times as much. Alberta increased its production from 193,179 to 17,550,000 pounds; Saskatchewan from 2,292,755 pounds to 7,600,098; and Manitoba from 12,225,261 to 17,550,000 pounds.

With a production in excess of domestic consumption the high quality of Canadian butter has been well justified, easily secured entry for it into foreign markets, and large quantities now find their way to the United States and the British Empire. In 1922 Manitoba exported 180 carloads of comers butter containing 3,862,264 pounds, which found its way not only to Eastern Canada but to the United Kingdom, Canada, and New York. The amount of the export of butter in 1922 amounted to 7,178,571 pounds, or 65.1 per cent. of the total production. Of this only 25 carloads went west, the remainder of 255 carloads went to the United States and British market.

Gratifying reports concerning the quality of Saskatchewan butter and its suitability for the best British trade were received from a number of foreign buyers. During the year the province of Alberta shipped its first butter to the United Kingdom via the Panama Canal, and this was effected with entire satisfaction, according to the reports of the British Consul at Comptons. Four thousand boxes were forwarded in this manner, received in excellent condition, and found a profitable market.

Balizing is perhaps the most significant development. Canadian lumbering at the present time, heralding a new era in the agriculture of the prairies. The number of dairies in Alberta is now 75, having increased from 10 in 1910. In Saskatchewan there are 65 dairies and an approximately equal number in Manitoba. They have changed the uses of the western landscape, interspersing numerous dairy farms, timber roads, and settlements, and adding to a substantial manner to the improvement of Western Canadian agriculture.

The number of dairies in Alberta is now 75, having increased from 10 in 1910. In Saskatchewan there are 65 dairies and an approximately equal number in Manitoba. They have changed the uses of the western landscape, interspersing numerous dairy farms, timber roads, and settlements, and adding to a substantial manner to the improvement of Western Canadian agriculture.

Automobile Production

Automobile production in Canada during 1922 was valued at \$14,054,150, which is a considerable increase over the previous year, when the output was valued at \$51,662,275, according to a report issued by the Federal Bureau of Statistics. A small and increasing part of this value of business is for export. In 1922, \$24,059,191 worth of automobiles and trucks were shipped abroad to practically every civilized country on the globe.

The home of the chestnut in the Mediterranean region, where chestnut trees have been cultivated from early times.

### Briquetting Plant

Site of Plant at Bismarck to be Decided

The site of the briquetting plant at Bismarck, S.D., in which \$1,000,000 has been spent by the Federal Government and the Provincial Government, is to be decided within the next few weeks.

During his stay in Ottawa, Hon. J. G. Gardner, minister of highways in the Saskatchewan Government, had a conference with the Canadian representative with the suggestion that there is too much advanced education for young people not fitted to receive it.

He has put his hands as our

objective advanced education for all people. We refuse to think only about the clever boys and girls. Who, indeed, can tell which the clever ones are at twelve years old?

The members of the working and lower middle classes ought to have precisely the same chance of full education as the normal child of the wealthy has today. We don't ask for a college or a university, but a man is clever enough we give him the chance of being educated in a public school, not right up to the top of the class.

Intelligent Handling is Needed to Secure Best Results

When using an incubator for the first time, one is fortunate if a high percentage hatches successfully. Success is not to be able to do even the clearest directions in work of this sort. Exhibition Circular No. 2 of the Experimental Farms, recommending a well ventilated cellar for the incubator, is not to be faulted, but the location of the machine, in this case, fresh air is necessary, but draughts should be avoided. It is also important, if one has not a suitable incubator, that the temperature should not be so high that it does not vibrate when walked upon.

To get satisfactory results it is necessary to have to the conditions right in relation to heat, moisture, cooling, turning and hatching.

The incubator is a valuable piece of equipment, but the care in its use is made, "Artificial breeding," and obtainable from the Publications Branch, deals with these points and shows by illustrations and contrast the natural and artificial methods of eggs for hatching. An essential point brought out is that the eggs for hatching should be from virgin hens well fed stock. With such care the incubator should be successful if properly handled, to yield a good proportion of chicks from the eggs entrusted to it.

The increasing cost of fuel has led to the development of a heating stove that will burn kerosene, that will burn a portion of the heating system of the house.

Scouts from over 1,500,000 households are using stoves which burn kerosene, which last 15 years each. One Nova Scotia scout last year had a contract for 10,000,000 stoves.

It requires 12,600,000 new each year to supply the Canadian railways and shipping lines.

Telephone and telegraph companies use one million poles each year.

The coal mines of Nova Scotia use one million trees, or 25,000,000 linear feet or timber, each year for mine rooms.

There were over 12,000,000 boxes and packing cases made in 1922, also nearly 3,000,000 cheese and butter boxes.

Forest forecasts, after supplying all this material, will continue to do an enormous normal growth, provided they are protected from fire. Forest fires are destroying more timber annually than is used in commercial purposes. Save the trees, plant and save the wood-using industries.

### Natural Resources Bulletin

Immense Amount of Lumber Used for Commercial Purposes

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa, says:

"The amount of lumber used for

commercial purposes

in 1922 was \$1,715,975, comprising \$1,029,550 for Manitoba, \$258,412 for Saskatchewan, \$239,377 for Alberta, \$273,000 for British Columbia, the total value of the previous year increased.

The value of production in 1922 was \$1,260,352, or 17 per cent. of the total value of lumber production, white pine, 11 per cent.; Douglas fir, 11 per cent.; pine, 7 per cent.; and tulip, 6 per cent.

The value of the Yukon, Alaska and Prince Edward Islands in 1922 was \$132,000, a value over the previous year.

The name "peking" or orange peking is given to the Chinese ham," Pek," has a very good white ham," Pek," refers to the small ham, which is cut in this tea when look like stems, but are the finest parts of the leaf.

The increasing cost of fuel has led to the development of a heating stove that will burn kerosene, that will burn a portion of the heating system of the house.

Scouts from over 1,500,000 households are using stoves which burn kerosene, which last 15 years each. One Nova Scotia scout last year had a contract for 10,000,000 stoves.

It requires 12,600,000 new each year to supply the Canadian railways and shipping lines.

Forest forecasts, after supplying all this material, will continue to do an enormous normal growth, provided they are protected from fire. Forest fires are destroying more timber annually than is used in commercial purposes. Save the trees, plant and save the wood-using industries.

### Many German Settlers

Steady Increase in Settlers from Germany

Steady increase in the immigration of Germans to Canada is shown in a return table in the house. In 1922, 1,235 Germans came to Canada from Germany. This is a remarkable figure.

Accurate figures for the first two months of 1923 show 621 Germans immigrating to Canada, of whom 219 were ag-

riculturalists.

Canadian immigration agencies in Great Britain employ 125 persons at a total annual payroll of \$153,672, according to figures given in the house.

In continental Europe, where there are 28 immigration agencies, whose payroll is \$18,518, and in the United States there are 31 at an annual cost of \$90,171.

### For Market at Edmonton

More than \$100,000 worth of raw timber is shipped to Edmonton each month and a exchange will be established at Edmonton. It is expected that this institution will give a useful impetus to this important Alberta industry.

A belt dating back to the time of St. Patrick has been found in the St. Louis, Mo., area. The belt is made of Nendrum Abbey in Ireland.

The home of the chestnut in the

### Labor and Education

#### Giving Children of the Rich and Poor An Equal Chance

Mr. Trevelyan, minister of education in the Marconi Government, in an article in the *Labour Magazine*, describes his first object has been to bring to the attention of the country in educational expenditure based upon the recommendations of the Geddes committee. He refers to these as "an arose and needless economy." Trevelyan says that the country with the exception that there is too much advanced education for young people not fitted to receive it.

He has set up a research plant at Ottawa, Hon. J. G. Gardner, minister of highways in the Saskatchewan Government, had a conference with the Canadian representative with the suggestion that there is too much advanced education for young people not fitted to receive it.

During his stay in Ottawa, Hon. J. G. Gardner, minister of highways in the Saskatchewan Government, had a conference with the Canadian representative with the suggestion that there is too much advanced education for young people not fitted to receive it.

Manitoba was concerned in the proposition in the extent of \$250,000 during 1923. However, the Manitoba Government withdrew from the conference on account of economy, and since that time the research work has been carried to a successful conclusion by the other two governments.

Intelligent Handling is Needed to Secure Best Results

When using an incubator for the first time, one is fortunate if a high percentage hatches successfully. Success is not to be able to do even the clearest directions in work of this sort. Exhibition Circular No. 2 of the Experimental Farms, recommending a well ventilated cellar for the incubator, is not to be faulted, but the location of the machine, in this case, fresh air is necessary, but draughts should be avoided. It is also important, if one has not a suitable incubator, that the temperature should not be so high that it does not vibrate when walked upon.

There were over 12,000,000 boxes and packing cases made in 1922, also nearly 3,000,000 cheese and butter boxes.

Forest forecasts, after supplying all this material, will continue to do an enormous normal growth, provided they are protected from fire. Forest fires are destroying more timber annually than is used in commercial purposes. Save the trees, plant and save the wood-using industries.

Scouts from over 1,500,000 households are using stoves which burn kerosene, which last 15 years each. One Nova Scotia scout last year had a contract for 10,000,000 stoves.

It requires 12,600,000 new each year to supply the Canadian railways and shipping lines.

Telephone and telegraph companies use one million poles each year.

The coal mines of Nova Scotia use one million trees, or 25,000,000 linear feet or timber, each year for mine rooms.

### We Made A Mistake

We made a mistake in last week's issue. The Gold and Silver subscriber had gold instead of silver.

The same day there was a letter in our post office box that did not belong to us. We called for it and the telephone number was No. 50, 50th and when we got home we found it was No. 60. The train was reported 30 minutes late. We arrived at the door minutes after the train and the train was gone.

We got our milk bill and there was a mistake of ten cents in our favor. We felt sick and the doctor said we were getting too much milk. We had not eaten meat for two months.

Mr. E. E. Estell is slightly improved after suffering for the past two weeks with abscesses, both ears being affected.

Mr. and Mrs. Chris Kublik arrived from Edmonton on Saturday. They were called to the city on account of the serious condition of their son, a brother, Mike Kudlik, who is in the hospital with pneumonia. He is still in a very low state.

On Thursday evening of last week over fifty persons attended a farewell party at the home of Mr. and Mrs. H. C. Cratchett, 1022 10th Street. Miss H. C. Cratchett, a native of England, was the gift of a friend.

The presentation was made by Isabelle Mann and Kathleen Gontier. The evening was pleasantly spent in dancing.

Mrs. Theo. Pederson received the sad news on Tuesday of last week of the death of her son, Nils Kristian Pederson, which occurred at Durango, Norway, on March 5th. The late Mrs. Jakobson, who had been very ill for the past ten months, died on the 25th of January, 1924, at the age of 71.

There are left to mourn her memory, a brother, two sons and a daughter, seventeen grandchildren and five great grandchildren. The services were extended to Mrs. Pederson on the loss of an uncle, John Nelson, who was killed just two days prior to the death of her mother.

—

Third Alberta Man Honoured.

A Pallesen, one of the best known dairymen of the province, has been honoured by the Danish government, with the Order of Dannebrog, a Danish Knighthood, this being the first resident of Alberta to be so honoured.

—

The MIRROR JOURNAL and

the Montreal Herald and Family Star for \$2.25. A copy of the premium picture "A Wonderful Heroine," is now on display at the printing office.

## Mirror and the District

J. G. Russell spent the Easter holidays in Calgary.

N. J. Denevereux is a business visitor in Edmonton.

Jas. Common, of Calgary, was home for Easter Sunday.

Mr. and Mrs. Geo. Skett returned Tuesday from Edmonton.

H. W. Pannecker was a business visitor in Calgary over the weekend.

Purser containing small sum of money awaits an owner at The Journal office.

Mr. and Mrs. F. L. Smathers and son Leslie, were Ferintosh visitors last Sunday.

W. J. Paton, of Kamsack, Sask., is spending a few days at his home in the Hickling district.

H. W. Fortune, of the Royal Canadian staff here, spent the Easter holidays at his home in Lethbridge.

W. J. Gilson, who has been visiting Mr. and Mrs. J. Brindley for some time, left on Tuesday for Camrose.

Mrs. Eunice Cook, of Drumheller, was the guest of Miss Winnie Oldring, for several days this week.

The weather man is not yet on his good behaviour, and the days are far from being warm and springlike.

Mrs. W. J. Ballantyne and daughter, Granda, and Jean, are here for a visit. They are staying with friends in Medicine Hat.

Mrs. E. E. Estell is slightly improved after suffering for the past two weeks with abscesses, both ears being affected.

Mr. and Mrs. Chris Kublik arrived from Edmonton on Saturday. They were called to the city on account of the serious condition of their son, a brother, Mike Kudlik, who is in the hospital with pneumonia. He is still in a very low state.

### Court Whist

The home of Mrs. Claus Sarles was the scene of a mucky court whist party on Wednesday evening last, the 16th inst. The presenters were Mr. and Mrs. C. L. Colburn, Watters, Conaway, Bell, Morrison, Kehoe, Stirling, Bull, Williams, L. Ray, Baugh, Walker, E. A. Lee, and Mrs. C. M. Colburn. Members, Whitling, Aylesworth, Flawing, Hopkins, and Miss Annie McLeod.

The first prizes, silver trophies, were won by Miss Carl McCormack and Mrs. N. J. Denevereux; and the consolation winners were Mrs. A. R. Hopkins and Mrs. J. Annesley.

After the prizes were awarded the hostess served a dairy lunch.

After the departure of her guests, Mrs. Sarles was very much surprised to find a sterling silver pyrex pie crust role, left by them, as a remembrance of her birthday anniversary.

WAGON Gear for sale. For further particulars apply at The Journal office.
